

**SP&S "Streamliner"  
Limited Edition Special Run**

**Coach 304  
Coach 305**

*Announcing a very limited run of custom decorated passenger cars.* Micro-Trains is being commissioned to decorate Kato smooth side coaches for the SP&S Rwy. These will be the standard Kato smooth coach. Production on this release will be limited to two road numbers. The 304, shown above and the 305. They will have Micro-Trains trucks and couplers. I know you will love these cars that have never before been produced in N scale! After these coaches, there are plans for several other SP&S passenger cars, so yes, you can have a SP&S "streamliner" on your railroad! The production of these Kato / Micro-Trains is complicated as I have learned from the Great American Circus Series. I expect these coach's will be ready to deliver at the end of 2009. But seriously, do not wait until then!
